Grade 2 Yellow (Ren) class

This week, the Yellow Ren class proudly performed their own version of *Charlotte and the Beanstalk*! The students had been working hard for weeks to help write their scripts, practice pronunciation, and rehearse their lines. This performance helped them grow in their oral communication, reading fluency, and writing skills. The effort, teamwork, and enthusiasm they showed were truly impressive. Amazing job, Yellow Ren class!

Grade 2 Green (Ren) class

In Grade 2 Green Ren class, the students worked together to practice their use of conjunctions and compound sentences. They read the first part of the sentence and choose the correct conjunction to match the ending of the sentence. Afterwards, they switched to do peer marking which another table will check or make corrections to another tables work. This activity helped students apply their understanding of compound sentence structure.

在二年仁班綠組中，學生們一起練習連接詞和複合句的運用。他們先閱讀句子的前半段，接著選出正確的連接詞與相對的節尾。之後，學生輪流互相批改，由另一個小組的學生檢查或修改彼此的作業。這項活動幫助學生更佳了解複合句結構的運用。

Grade 2 Green (Xin) class

In Grade 2 Green Xin class, the students continued to practice implementing their learning on nonfiction text features and identifying the difference between fiction and nonfiction book covers. They individually identified the type of book then used a word bank of text features to sort in the correct category. This activity encourages students to have deeper thinking to provide reasoning as to how they know the book type by using the appropriate vocabulary.

在二年信班綠組的課堂上，學生們繼續練習運用非文學類（非虛構小說）文本的特徵，並辨識文學類和非文學類書籍封面之間的差異。他們獨自識別書籍類型，接著使用文本特徵的詞庫進行分類。這項活動鼓勵學生進行更深入的思考，並使用適當的詞彙來解釋他們如何辨別書籍類型。

Little Critters

Have you ever looked closely at the little critters around us? They are amazing! They live in gardens, parks, and sometimes inside our homes.

Ants are small insects that live in big groups called colonies. They work together to find food and build their homes. Ants can lift things that are much heavier than they are!

Ladybugs are colorful beetles with red bodies and black spots. They are friendly bugs that eat aphids, tiny pests that harm plants. Many people believe ladybugs bring good luck!

Butterflies start as caterpillars and change through a process called metamorphosis. They come in many colors and patterns.

Spiders have eight legs and can spin webs to catch food. They can catch insects that are bigger than themselves. Some spiders are tiny, while others can be quite large!

Bees are important little critters that help plants grow. They collect nectar from flowers and spread pollen, which helps flowers make seeds. Honeybees even make sweet honey!

Little critters are important. Next time you're outside, take a moment to look for them and see how they live!

Comprehension Questions. Answer in complete sentences.

1. What types of places do little critters live in?

3. What can spiders do with their webs?
